RE: Olin Corp./McIntosh Plant Superfund Site
McIntosh, Alabama - Preliminary Site Characterization
Summary Report

Dear Mr. Downey:

You should have received via federal express (April 17, 1992) a copy of the Preliminary Site Characterization Summary (PSCS) Report for the Olin/McIntosh Site. If you have not received two copies of this document, please give me a call as soon as possible. I am sending a similar letter to Fred Harders in Commissioner Martin's office. I informed him that you will be transmitting him a copy of the document. I also transmitted the document to Danny Moore in Dr. Mancini's office. If there are any other offices that you feel need to be included in this review process, please let me know.

This document should be reviewed in conjunction with the Phase II Sampling and Analysis Plan (SAP) previously submitted. I am requesting specific comments on this document on or before May 11, 1992. Any deficiencies and/or data gaps noted in the PSCS can then be incorporated into the Revised SAP.

If you foresee a problem with meeting the requested deadline, please contact me at (404)347-2643 as soon as possible. Thanks for your cooperation in this matter.

Sincerely,

Arthur J. Collins

for Cheryl W. Smith
Remedial Project Manager
South Superfund Remedial Branch
